**FRAZIER**  
 Historical Arms  
 MUSEUM

Thursday, September 15, 2005  
 6:30pm – 8:30pm

Take an unforgettable journey through history that spans 1000 years and 2 continents. The Frazier, in collaboration with the Royal Armouries (Britain’s oldest museum), holds in trust one of the greatest collections of arms, armor and related historical artifacts in the world.

Many of the pieces displayed in the Frazier Museum once belonged to famous politicians and celebrities, noted frontiersmen and soldiers. At no other museum in the world will you find the ceremonial sword of Founding Father Josiah Bartlett, the family bible of legendary pioneer Daniel Boone, the “Big Stick” of President Theodore Roosevelt, the bow attributed to the great Apache warrior Geronimo, or the ivory-handled Colt pistols of General George Armstrong Custer. Thanks to the unique and historic collaboration with Royal Armouries, the Frazier will also display the arms and armor of kings and knights; the possessions of Henry VIII and Elizabeth I, and other wonderful artifacts from Europe that date back 1,000 years.

Through the use of powerful interactive displays, state-of-the-art multi-media presentations and dynamic performances by costumed interpreters, history will come alive at the Frazier as never before. Join the fun at the discounted group prices of \$35 per person. Price includes transportation to/from the hotel, heavy hors d’oeuvres, and admission to the museum. Cash bar will be available at the event. *Pre-registration required for this event.*

**KSMA Banquet & Awards**

Presenter: Stephen Krashen

**Has reading declined in the United States?**

About a year ago, a widely quoted report, Reading at Risk, announced that reading was in a decline in the US, and the decline was especially serious among young people. There is very good evidence that this conclusion is not accurate: Comparisons with earlier reports show an increase in reading since the 1940's, other data shows no decline in book reading, there is strong evidence that intellectual life in the US remains vibrant, and Reading at Risk did not consider other kinds of reading. Most important, Reading at Risk ignored the real problem: Those who come from low-income families have little chance to read, because of the lack of books in the home, the community, and the school.

Presenter: Stephen Krashen

Free voluntary reading, or recreational reading, is the most powerful tool we have in language education. Those who read more read better, write better, have larger vocabularies, and have better control of complex grammatical constructions. The most important factor in encouraging reading is providing access to books: Studies show that better school libraries and more books in the home result in more reading, and hence more literacy development. Children of poverty have only one possible source of books: Libraries.

Kentucky is a diverse region of geographic and cultural features. Kentucky children's literature should reflect the state's diversity in its themes, plots, settings, and characterization.
